

TORANA 2 & 4 DOOR'S AUSTRALIA'S ONLY 6-CYLINDER COMPACT- GOES VERY WARM, HANDLES VERY COOL

When you've got a good thing going, you keep it going. Which is why Torana 6 hasn't been changed just for the sake of change. Instead, it's been refined. So that now it's an even better car than it was before . . . and that's really saying something. After all, you don't get to become the light car sales leader for nothing.

You get all the traditional features that have made Torana king of the road. Things like the famous Holden six-cylinder engines —standard '2250' with 95 horsepower or optional '2850' with 118 horsepower . . . ideal for highway cruising or towing a boat or caravan.

Things like road-hugging handling and super-smooth ride with wide track and 4-coil suspension. Torana's exclusive sporty fastback styling. Go-anywhere reliability.

And your choice of transmissions starting with standard three-speed column-shift (all-synchro) or optional fast and sporty 4-on-the-floor through to the renowned 'Tri-matic' three-speed automatic transmission with column or floor shift. Now even smoother than ever with new, positive electrically controlled kickdown for brisk acceleration when overtaking.

Now for the refinements . . . the things that make Torana even better value than before. There's a handsome new grille. New wrap-around tail lamp assembly. New colours. Inside, deep foam bucket or optional bench seats that are more thickly padded than ever. With adjustable head restraints as standard. And more, much more. Six-cylinder performance/four cylinder economy. With the rally-proven Torana 6, you just can't go wrong. Like the man says . . . when you're hot, you're hot!
